SUMMARY

Results-driven Senior Software Developer with 10+ years of experience in designing scalable microservices architectures, optimizing cloud infrastructure with AWS, and implementing event-driven systems. Certified AWS and Terraform Associate with expertise in Backend Development using AWS, Spring Boot, Kafka, Kubernetes, AWS Lambda & CI/CD pipelines.

EDUCATION

Stevens Institute of Technology, Hoboken, NJ, USA (*Master of Science in Computer Science and Software Engineering*) **May 2020**

Manipal Institute of Technology, Udupi, India (*Bachelor of Technology in Electronics & communications Engineering*) **June 2013**

TECHNICAL SKILLS

Programming Languages: Java, Java multithreading, python

Middleware & Streaming: Kafka, SQS, ActiveMQ, Spark

API Architecture: Rest API, GraphQL, gRPC, SOAP

Cloud Technologies: AWS (Lambda, SQS, API gateway, Parameters Store, Event Bridge, Step functions, EKS, Secrets Manager, IAM, KMS, route 53), Pivotal Cloud Foundry

Project Management: Jira, Agile, Scrum

Java Frameworks: Spring Boot, Spring cloud, Netflix OSS, Spring webflux, Spring Transactions

ORM Tools: Hibernate, JPA, SQL Alchemy

Databases: Oracle, PostgreSQL, Cassandra, MongoDB, DynamoDB

CI-CD and IaC tools: Jenkins, Kubernetes, Docker, Gitlab, Ansible, Maven, Gradle, Terraform

Architecture: Microservices, Domain Driven Design

CERTIFICATIONS

- AWS Certified Associate Developer
- Terraform Certified Associate Developer

PROFESSIONAL EXPERIENCE

Ernst And Young US LLP, Hoboken, New Jersey: Senior Software Developer

Nov 2020 - Current

- **AWS Microservices Architecture:** Engineered and Developed serverless event-driven microservices using **AWS Lambda, SQS, Event Bridge, S3, Step Functions, API Gateway & ALB**, orchestrating **Account lifecycle management** in **Direct Indexing Platform** and improved system **scalability** by 40% and reduced **operational costs** by 25%.
- **Cloud Infrastructure Management:** Implemented **Infrastructure as Code (IaC)** using **Terraform**, managing entire **cloud infrastructure** with 99.9% **uptime**. Achieved 50% faster **deployment cycles** and 30% reduction in **configuration errors** across multiple environments.
- **Database Optimization:** Implemented advanced **data modeling techniques** for representing **PostgreSQL** tables in **SQLAlchemy ORM**, resulting in 35% improved **query performance** and 20% enhanced **data integrity**.
- **Microservices Deployment:** Architected file processing workflows for **Agency Lending Business** using **Spring Boot** and **Amazon EKS**. Streamlined **S3 feed handling** from multiple intermediaries, leveraging **Amazon SNS** for orchestration, increasing **throughput** by 60%.
- **Order Processing Applications Migration:** Led **Migration of Order Routing and Executions applications** from **Tibco** to **Apache Kafka** and optimized processing of **Limit Orders and Market Orders(Both sell and Buy)**, and **Bid Wanted Orders** in **Brokerage Services (FBSI)** that uses **FIX protocol**, improving **efficiency** and reducing **latency** by 45%.
- **Continuous Integration Enhancement:** Implemented **FIX message simulation** using **VeriFIX** for **Order Execution applications**, isolating external dependencies and henceforth Improved **integration testing efficiency** by 70% and reduced **regression issues** by 50%.
- Optimized API endpoints using **Reactor's Flux** and **Mono** for asynchronous data handling, enabling the application to remain highly responsive resulting in a **60%** increase in overall customer usage

Colaberry Inc, New Jersey, USA: Senior Software Developer

June 2020 – Nov 2020

- **API Development & CQRS:** Engineered **Spring Boot APIs** using **CQRS pattern** to monitor warehouse order processing activities and automate third-party updates using event driven serviceKafka, enhancing e-commerce order fulfillment efficiency by 35%.
- **Omnichannel Retail Integration:** Implemented microservices to achieve **BOPS (Buy Online Pickup in Store)** and **BOSS (Buy Online Ship from Store)** functionality, achieving 99.8% order accuracy through real-time **UPS integration** and event-driven lifecycle management.
- **Inventory Optimization:** Designed a **location hierarchy system** with **Spring Boot** and **Hibernate**, generating **GS1-compliant barcodes** for 50,000+ locations and integrated order delivery to these lockers for customer pickup.
- **Real-Time Data Processing:** Built a real-time pipeline with **Kafka Streams** and **KSQL** to process invoices and inventory data, exposing insights via **RESTful APIs**, improving data visibility by 40% and decision-making speed.

Previous Experience: Senior Software Developer

June 2013 – Jan 2019

- **Software Engineering Roles:** Held various software engineering positions at Deloitte USI India (2017-2018), Zensar Technologies India (2016-2018) and Mahindra Comviva (2013-2016) India specializing in full-stack application development using Angular 4 and Spring Boot. Focused on diverse aspects of software engineering, including design, development, and deployment.
- **Cloud Services Mocking and Cloud Development Tools:** Utilized Local Stack to mimic AWS cloud services such as Systems Manager (SSM), Secrets Manager, and AWS Lambda, enabling efficient local development of cloud applications.
- **Microservices Architecture:** Worked on the redesign of a monolithic application into microservices architecture using Spring Boot and deployed to spring boot by adhering to the 12-factor app methodology.

Visa Status: H1B (with i140 approved)
